SUMMARY

With over a decade of professional experience, I have developed skills in various areas, including graphic design, digital marketing and web development. Among my experiences, I've worked for Acushla and Tetribérica, both in digital roles. At Acushla, I mainly focused on developing the company's website and labels for different products and countries, while also participating in production and bottling occasionally. At Tetribérica, I worked in digital marketing, and developed skills in social media marketing, email marketing and website management.

In terms of technical skills, I'm proficient in various software such as Photoshop, Illustrator, Microsoft Office, HubSpot and e-goi.

In addition to my professional experience, I attended a 14-Week Intensive && Immersive Full Stack Programming Bootcamp at <Academia de Código_> with the aim of changing my life. I am highly motivated and eager to learn, and I am excited to take on new challenges and expand my knowledge and skills.

If you're curious, you can see all the positions and companies I've worked for, as well as my entire academic background, on my [LinkedIn](#).
